Preface: Masterformat 07 21 13.06, Expanded Polystyrene Insulation Board and Pipe Covering

Preface Issued:	2012-03-05
------------------------	------------

Scope

This Evaluation Listing applies to factory-made, rigid expanded polystyrene insulation in the form of pipe covering and boards with or without facings or coatings and made by molding (EPS) or extrusion (XPS) of expandable polystyrene beads. It is intended for use as a thermal insulation in building construction and other applications within the temperature range of -54°C to $+75^{\circ}\text{C}$.

Products covered by one of the standards listed below are also used for sound insulation and in prefabricated thermal insulation systems and composite panels. The performance of systems incorporating these products is not covered by the Evaluation Listing.

The proponent has demonstrated that the product meets at least one of the following standards:

- CAN/ULC-S701-05, "Standard for Thermal Insulation, Polystyrene, Boards and Pipe Covering"
- CAN/ULC-S701-11, "Standard for Thermal Insulation, Polystyrene, Boards and Pipe Covering"

Products meeting the above standards are classified as Type 1, 2, 3 or 4.

Notes:

1. The molded/expanded polystyrene (EPS) insulation industry subscribes to an accredited certification program as part of their quality assurance. The Listings for EPS insulation products that are published in the Registry are based on the participation of one of the certification organizations accredited by the Standards Council of Canada (SCC).
2. Annex A of CAN/ULC-S701-11 includes requirements for flat, uncoated EPS thermal insulation boards that are to be used in exterior insulation and finish systems (EIFS). Annex A forms a mandatory part of the Standard.

Notes to Table 1:

- 1 As per CAN/ULC-S701-11, where EPS insulation is to be used in EIFS applications, users must refer to Annex A for mandatory additional requirements.
- 2 CAN/ULC-S701-05 requires a minimum value of $1.73 \text{ m}^2 \cdot ^\circ\text{C}/\text{W}$ for a 50-mm-thick product. The long-term thermal resistance value must also be reported for the 25-mm- and 75-mm-thick products.
- 3 CAN/ULC-S701-11 requires a minimum value of $1.68 \text{ m}^2 \cdot ^\circ\text{C}/\text{W}$ for a 50-mm-thick product. The long-term thermal resistance value must also be reported for the 25-mm- and 75-mm-thick products.
- 4 CAN/ULC-S701-05 requires a maximum value of $60 \text{ ng}/(\text{Pa} \cdot \text{s} \cdot \text{m}^2)$.
- 5 CAN/ULC-S701-11 requires a maximum value of $90 \text{ ng}/(\text{Pa} \cdot \text{s} \cdot \text{m}^2)$.

Labelling

The product must be marked with the following information:

As per CAN/ULC-S701-05:

- type;
- ULC standard number; and
- manufacturer's name or trademark.

As per CAN/ULC-S701-11

- type;
- ULC Standard number;
- product thickness;
- thermal resistance per unit of thickness (LTTR for XPS insulation);
- production identification number; and
- manufacturer's name or trademark.

As per both standards, the product must also be marked with a warning:

“Caution: This product is combustible. A protective barrier or thermal barrier is required as specified in the appropriate building code.”

1. Evaluation

The products conform to CAN/ULC-S701-05 and CAN/ULC-S701-11.

2. Description

The products are Type 4, green-tinted extruded polystyrene (XEPS) rigid board thermal insulation.

The different model designations are based on the ends being square or shiplap or the insulation having a thin plastic cap sheet on both sides.

The insulation is available in various thicknesses, ranging from 12.5 mm to 75 mm, in widths of 600 mm or 1 200 mm and lengths of 2 428 mm or 2 743 mm.

A 25-mm thickness of the insulation has a water vapour permeance of 37.0 ng/Pa·s·m².

3. Standard and Regulatory Information
