Quality & Durability

With rugged use construction and more solid wood than the competition, Kitchen Compact cabinets are built to withstand the rigors of multi-family usage:

- All frames are built of solid 3/4" oak, maple, or beech. Each rail is kiln-dried, joined by mortise and tenon, and then glued for added strength.
- Solid wood corner blocks are glued and power nailed.
- Solid wood toe kicks, 3/4" thick.
- Solid wood hanging rails on wall and base cabinets.
- End panels consist of 3-ply construction, 1/2" thick engineered wood core with hardwood veneers.
- 100 lbs. rated drawer suspension system.
- Meets HUD and KCMA ANSI 161.1 standards for cabinets.
- CARB 93120 Compliant Phase 2.
- Made in the USA.

And there's more. All Kitchen Compact cabinets feature 1/2" plywood drawers as a standard. A front-to-back epoxy-coated drawer system is securely attached to a solid wood strip in the back of the cabinet for stability and years of smooth operation. Visit our website for more info!
