

# WALL PANELING

States wall paneling features natural wood veneers finished with ultraviolet cured coatings, making them as durable and resilient as they are beautiful. More than forty distinct standard styles of 4' X 8' panels are offered in thicknesses from 5/32" through 3/8" thick.

The line includes eleven different species of real wood, stained, top coated and grooved in one of seven patterns. Looks range

from traditional beaded patterns to contemporary ungrooved panels.

In addition to residential applications, these panels are widely used in light commercial and institutional applications, as well as in manufactured offices.

All States Industries paneling is made from natural wood veneers. States exclusively features NOVA® ultraviolet cured topcoats which are impervious to

household stains and solvents. States Industries paneling is made in America by American craftsmen.

States Fine Hardwoods  
with Beautiful and Durable Finishes.

Most States wall panels can be ordered as FSC® certified.
