

FAQ

What is Grayne?

Grayne is a natural cedar replacement. It's prefinished, instantly delivers the look of aged cedar, and is not susceptible to moisture absorption.

What cladding market is Grayne selling into?

The hardboard market. Grayne is a natural cedar replacement, but can replace or complement fiber cement & engineered wood products.

What profiles does Grayne offer?

5" plain sawn shingle, this is the most common profile in natural cedar.

What material is Grayne made out of?

Grayne is an engineered composite with a high performance, weather resistant cap.

What is Grayne's thickness?

Grayne's thickness is designed to optimize performance. It is certified by Florida Building Code and Texas Department of Insurance. This means it exceeds 170MPH wind load.

Is Grayne strong enough to take a blunt force impact?

The cavity back design was created for blunt force impacts. The panelized board can deflect and absorb the energy from any impact such as a baseball, golf ball, rock, hail, etc.

Do furring strips need to be installed prior to installing Grayne?

No. Grayne's cavity back design allows for airflow behind the panel, saving time and money vs. installing on wooden laths.

What fire rating does Grayne achieve?

Grayne achieves a class 1A Fire Rating.

What accessories are used with Grayne?

Same as wood. Grayne also offers Kleer cellular PVC trim as easy to use, low maintenance accessory package.

What colors can I get Grayne in?

Grayne is available in 6 pre-finished cedar colors that have light and dark points like natural cedar. This is a new process made exclusively for Grayne Engineered Shake & Shingle.

What is Grayne's warranty?

Grayne has a 50/5 year limited warranty, 50 years of manufacturing defects and 5 years on labor.

Where will Grayne be manufactured?

The product is manufactured in the Tapco Franklin Facility near Cincinnati, Ohio.

How many different shingles does Grayne have?

Grayne has created a panelized system consisting of 72 unique woodgrains on 8 different panel configurations.
