

KLAUER
Quality Since 1870

Color Selection Chart

All Klauer colors have a two coat baked-on polyester enamel finish applied over hot-dipped galvanized steel that provides years of maintenance-free and worry-free service. They are also resistant to corrosion, fading and chalking, while providing excellent color retention. With the most comprehensive color selection in the industry we are able to provide quality, durable, long lasting products for most residential, agricultural or commercial applications.
